

# The Bee's KNEES

**The Bee's Knees #TBK bridge the gap between physical and digital cards.  
Here on Hedera Hashgraph!**

The Bee's Knees are 5000 unique bee character NFTs sold as a random mint on SentX.io Marketplace in five waves of 1000 NFTs.

Merchandise accompanies the collection: Art prints, T-Shirts, hoodies, mugs, towels and more, for those that want a physical keepsake from this collection. Available at my linktree website (details at the bottom of this page).

What makes this project unique is the physical card game; exclusively available to those that mint/own TBK#1-100.

20 of these special 100 NFTs are blended into each wave of 1000 NFTs.

**Wave 1 contains TBK NFTs #1-20 + #101-1080, Wave 2 contains #21-40 + #1080-2060, Wave 3 contains #41-60 + #2060-3040, Wave 4 contains #61-80 + #3041-4020 & Wave 5 contains #81-100 + #4021-5000.**

50 decks of the first physical card game (featuring TBK#1-50 of the total #5000 NFT collection) have been made, ready for the minters/owners of TBK#1-50 that claim their deck.

When the time approaches, I will make 50 copies of a second 50 card deck featuring TBK#51-100 and this will exclusively be available to minters/owners of TBK#51-100.

Minters/holders of the qualifying NFTs can get in touch with me on X.com or via email to claim one of the limited edition physical decks. The only charge will be postage, based on location and paid in HBAR.

There's a page on my Linktree showing a live list of TBK#1-100 NFTs that have had their physical deck claimed.

If you mint a TBK NFT from the SentX launchpad, you should associate HBAR Token ID 0.0.7368749.

This is the token for TBK Special Edition (TBKSE) animated NFTs that I make and give as rewards to buyers of this collection.

Throughout the waves of the launch there will be giveaway competitions for HBAR and NFT prizes held on my X account. Holding at least one bee that you've bought (and in some cases having associated the TBKSE token) will whitelist you to be able to win these extra prizes.

The Bee's Knees will be here long after all 3 phases. Thanks to glorious IPFS storage, they will likely be around for as long as the internet is! Hopefully the physical card games will be here for good, too!!

Follow me and get the latest updates on the project @Goodebags on X.com

If you don't use X and need to get in touch, email [goodebagsnfts.com](mailto:goodebagsnfts.com)

I've been making and selling NFTs since Nov '22 across various blockchains.

I plan to be here making NFTs and games for a long time!

**This Whitepaper has been updated twice since TBK's launch. The original whitepapers are available to view on my linktree.**
